PROFESSIONAL SUMMARY

AI Product Engineer with 7+ years of experience in product development, data science, and product management. I design, build, and ship AI products from idea to production, covering customer discovery, system design, UI/UX, LLM integration, machine learning, and launch. As Founder of D-SAi, I lead an 8 person product and engineering team and have launched four products: RetainCLM, InboxPulse, ScanRoster, and D-SAi AI Studio. I have delivered for clients and teams in the UK, Germany, UAE, and USA. I love building products, and I choose AI features by business value, then measure whether they work in production.

CORE SKILLS

AI and Generative AI: Large Language Models (LLMs), Generative AI, AI Agents, Agentic Workflows, Retrieval Augmented Generation (RAG), Embeddings, Prompt Engineering, Context Engineering, LLM Evaluation, Hallucination Detection, AI Workflow Automation, Claude API, OpenAI API, Gemini API, LangChain

Machine Learning and Data Science: Python, Pandas, NumPy, Scikit-learn, XGBoost, Predictive Modelling, Churn Prediction, Customer Segmentation, Sentiment Analysis, NLP, A/B Testing, Statistical Analysis, SQL, ETL Pipelines

Product Development and Management: AI Product Development, Product Strategy, Product Roadmap, Customer Discovery, MVP Development, Prototyping, PRDs, User Stories, Acceptance Criteria, Agile, Scrum, UAT, Go To Market (GTM), Pricing Strategy, OKRs, KPI Frameworks, SaaS, B2B

Engineering and Cloud: System Design, REST APIs, API Integration, Meta WhatsApp Business API, Stripe, AWS (EC2, S3, Lambda), Git, Web and Mobile Product Delivery

Analytics and Tools: Power BI, Looker Studio, Metabase, Google Analytics (GA4), Figma, Jira, Notion

PROJECTS

RetainCLM, AI Customer Lifecycle Management Platform
retainclm.com

- Built a B2B SaaS that predicts customer churn using machine learning models that score risk from behaviour, usage, and engagement data, shown as a live customer health score.
- Built AI Playbooks and a Win Back Engine that start retention campaigns automatically based on risk level and customer segment, with built in A/B testing to validate offers.
- Delivered cohort, funnel, and retention analytics, plus MRR, LTV, and NRR dashboards with 21 visualisation types, secured with email verification and two factor authentication.

InboxPulse, AI Powered Shared WhatsApp Inbox for Teams
inboxpulse.d-sai.com

- Built a multi agent team inbox on the Meta WhatsApp Business API with LLM generated reply suggestions, three drafts per message, and one click AI conversation summaries.
- Added AI sentiment detection to flag angry or urgent customers, plus smart assignment, canned replies, broadcasts, and a live analytics dashboard.
- Owned pricing and go to market, including a freemium model with four plans, AI usage limits by plan, and local bKash payments for small businesses in Bangladesh.

ScanRoster, Workforce Management for Hospitality
scanroster.com

- Designed fraud proof attendance where a rotating QR code, geofence check, and registered device must all match before a check in is accepted, with every rejection logged.
- Built an automatic shift cover engine that ranks available staff by skills, certifications, legal rest time, overtime limits, travel time, and past acceptance, then offers the shift in order.
- Shipped multi country payroll and compliance, including UAE WPS salary files, UK Working Time Regulations checks, a six language interface with Arabic support, and Stripe billing.

D-SAi AI Studio, Multi Model AI Workspace
aistudio.d-sai.com

- Built one workspace that brings together Claude, GPT-4o, Gemini, and Llama, with RAG answers from private business knowledge, AI agents, workflow automation, and AI usage monitoring.

WORK EXPERIENCE

Founder and AI Product Engineer
D-SAi, Remote | Jan 2025 to Present

- Lead product and engineering for an 8 person team covering full stack development, mobile app development, UI/UX design, QA, and growth.
- Handle Python backend work, system design, and REST API integrations, and lead the team that builds web products in Node.js, Next.js, and React and mobile apps in Kotlin and Flutter, deployed on AWS.
- Build AI business automation for clients, including AI agents, LLM powered workflows, and system integrations that replace manual tasks such as reporting, customer messaging, and data analysis.
- Own the full product development cycle: define the problem, design the system and interface, add LLM and machine learning features where they add value, and ship tested releases to production.
- Delivered client projects including a recruitment platform for MH Premier Staffing (London) and a bilingual German and English course platform for WAGA IT Bildung (Hamburg).

Data Analyst (Remote)
Analytic Company GmbH, Germany | Jul 2022 to Present

- Analyse and validate 7+ automotive datasets every month with 100% data integrity across 10 European markets using SQL, Excel, and JavaScript regex validation.

Business Analyst, LLM Evaluator (Contract)
Turing, USA, Remote | Jan 2026 to Apr 2026

- Evaluated hundreds of LLM responses every week using the SxS and GHD frameworks for helpfulness, accuracy, safety, and instruction following.
- Identified hallucinations and factual errors and wrote clear rationales that improved the quality of model training data.

Product Manager (Contract)
Plagit, UAE, Remote | Mar 2023 to Apr 2025

- Owned the full product lifecycle of a hospitality staffing SaaS from concept to live market in the UK, UAE, and Italy, released on web, iOS, and Android, leading a cross functional team of 6+.
- Turned business requirements into PRDs, acceptance criteria, and sprint backlogs, and improved platform uptime by 25% by deploying and managing AWS infrastructure.

Data Analyst (Part Time, Remote)
MH Premier Staffing Solutions, UK | Apr 2022 to Feb 2023

- Built a QR attendance system for 800+ staff across 81 clients, saving supervisors 10 hours per week, and 45+ Looker Studio dashboards that reduced payroll errors by 25%.

Reporting Analyst
Sheba Platform Ltd, Bangladesh | Mar 2021 to Jun 2022

- Improved retention ROI by 15% by analysing 1M+ user events, and reduced manual lead assignment time by 40% with a Python automation pipeline.

Earlier Experience
Project Support Officer, E-Zone HRM, 2020 to 2021.
Officer, Customer Profile Management, bKash, 2018 to 2020.

EDUCATION

B.Sc. in Electrical and Electronic Engineering, Varendra University, 2014 to 2018
